

The reason so many faith-based institutions turn to USSC?

Our people.

Whether preserving a pastoral setting at **synagogue**, or a peaceful learning environment at school, or allowing the freedom to fully participate at an event or public function – maintaining a secure and safe environment for all is both a delicate balance and a USSC specialty. To do it, we offer a wide array of protective and consultative services tailored exclusively for Jewish entities.

USSC SERVICES

- > **Armed and Unarmed Security**
- > **Active Shooter Training**
- > **Risk and Site Security Assessments**
- > **Emergency Action Planning (EAP)**
- > **Training for Emergency Action Plans**
- > **Scenario and Tabletop**
- > **SecureFlex (managed service, de facto security director)**

U.S. SECURITY CARE
Safeguards in an Unsafe World

ARMED AND UNARMED SECURITY: USSC TRAINING IS ABOVE AND BEYOND.

USSC's stringent recruitment standards apply to armed USSC agents as well. Every armed USSC agent is required to qualify twice annually using our NRA-certified "zero-miss" Course of Fire. We place a heavy emphasis on scenario-based training and weapons safety and handling skills designed to give our agents the knowledge and abilities to make good decisions in stressful situations.

The mere presence of our hand-selected professionals acts as a powerful visual deterrent, while lending a sense of comfort to congregation and staff alike. We hear it all the time: USSC agents are the best of all worlds: polite, effective, knowledgeable – and the consummate gatekeepers.

USSC agents, handpicked and recruited from law enforcement and the military, rank among the best in the industry. Professional, on point and vigilant – plus well-dressed, groomed and on time – every USSC agent arrives trained beyond typical security curriculums. Expertise includes CPR, AED (defibrillator), behavioral recognition, verbal de-escalation skill sets (verbal judo to defuse problems before they become emergencies) and, of course, impeccable customer relations.
